Pak Ahmad Hakim and DCEO teams,

Selamat siang dan semoga sehat selalu

Apologize due to late respond.

Regarding our discussion today which is our 3rd party personal already confirmed will joining the discussion.

We propose to visiting one of your facilities on Monday Nov 7th due to another sites same requirement to connecting external load.

Would you like if our team can visit one of your facilities on Monday, Nov 7th ?

Best Regards,

Fahmi Matinggwan

+CGK64 and CGK65 for Vis.

Dear Trakindo Team,

Any update for this thing? It's been almost two week from the last update.

If you don't mind, you can set up a meeting with us and also included the 3rd party.

Thanks and regards,
Bima.

Subject: RE: SOP For Generator Load Test with External Load Bank

Pak @Anar Reza Lesa Ananta

Could you communicate to the 3rd party who build the system? I guess these request related to procedure operation and diagram switching to the load bank.

=====

We notice in Single Line Diagram, there is interlock between incoming switchboard and this selector switch , but we are not sure how.

Dear Pak Wari & Trakindo team,

In regards to the Generator Load Test with external load bank for OPTDC/CGK63, can you please provide us with the SOP?

We notice in Single Line Diagram, there is interlock between incoming switchboard and this selector switch , but we are not sure how.

Your feedback is highly appreciated

Thanks

Salam,
Hakim
