CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Pak Nanang,

My apologies, was out of office earlier.

Please take this email as confirmation. The dates will stay from **4-7 March 2024**.

Suggest that your trainer come over on the **night before** so he can have a good rest before we kick start the training on the following day's morning.

- i. We have an additional request, can the trainer's accommodation, visa and flight/travelling/taxi expenses be covered by your end first and back-charge to us later?
We recommend this hotel for stay:

Genting Hotel Jurong

2 Town Hall Link, Singapore 608516

As it is only 20-25 minutes taxi ride to the training venue/shipyard.

- ii. We might include a Certificate Ceremony on the end of the training (Day 4, 07 March 2024). Once confirm, we will request a template from you.
- iii. Can we have the trainer's passport details to prepare Invitation Letter?

Thank you & Yours Sincerely,
Johnathan Giam

Dear Pak Nanang,

My apologies, I have removed some from the correspondence to seek some clarifications on the Training Quotation:

1. Is this training fee quotation based on official pricing (pricing for external) or internal pricing?
 - Just to clarify with you that this training is arranged by TUS in goodwill for the customer (i.e. customer will not be paying)
 - Customer is only supporting on training venue, coordinating logistics and invitation letter, if required.
 - Any cost and expense incurred will actually be bear by TUS only.
2. I may be wrong but my impression for PO is for transactions related to external customers. Will it be accurate to say that this will be internally billed?
 - Can you advise on the "PO Confirmation" process for internal billing? How do we proceed with confirmation?
3. As for the printing of materials, stationeries and merchandise; will you be sending these over by freight?
4. Just to confirm, **only 1 (ONE) instructor** will be assigned to conduct this training (i.e. Pak Setyo Baskoro)

Thank you & Yours Sincerely,
Johnathan Giam

Dear Pak [@Nanang Kurniawan](#),

Good day to you and I hope you are doing well.

Generally, customer is very satisfied with the training syllabus proposed by your team and we would like to move ahead with the **confirmation of training** to be conducted in Singapore.

- Training Duration: **To be confirmed 03 or 04 days required**
- Training Dates proposed: 04 - 07 March 2024
- Training Location / Venue: Strategic Marine Shipyard @ 05 Benoi Road, Singapore
- Number of Trainers: 02 pax
- Number of Participants: 15 – 20 Pax (Max at 20 Pax)

Further Information required:

- Names of Trainers
- Training Programme/daily schedule
(*If you can differentiate classroom and practical, it can help us to coordinate the logistics with Shipyard)
- Training Fee (yet to received updated training rates for 2024)

Finalised Topics as follows:

C32 Engine Syllabus

- Engine Specifications
- Improvement features from old generation C32
- CAT MECP panels
- Description of Engine systems
 - Fuel system
 - EUI & Injector System
 - Air & Exhaust System
 - Cylinder Head
 - Lub System
 - Cooling System
 - SCAC vs KC Comparison
 - SCAC Schematic
 - Electronic Control System Components
- Fluid Recommendations
- Operational Checks
 - Pre-Start Checks
 - Start-up / Low Idling Checks
 - Engine Stop Checks
- Maintenance
 - Simple Maintenance Procedures
 - Maintenance Schedule Intervals
 - Preventive Maintenance
- Simple Troubleshooting
- End of C32 Syllabus

C4.4 Genset Syllabus

- Genset Specification
- Feature & Benefits
- Description of Engine systems
 - Fuel system
 - Cooling System
 - Air & Exhaust System
 - Lub System
- Fluid Recommendations
- Operational Checks
 - Pre Start Checks
 - Start-up / Low Idling Checks
 - Generator Block Loading
- Maintenance
 - Simple Maintenance Procedures
 - Maintenance Schedule Intervals
 - Preventive Maintenance
- Simple Troubleshooting
- End of C4.4 Syllabus

CAT ET Overview (Newly added)

CAT GCCP 1.2 Deepsea panel for C4.4 (Newly added)

CAT Bonding (Newly Added)

Thank you & Yours Sincerely,
Johnathan Giam

Good Morning Pak Baskoro,

We will be more than glad to provide you with further information. Appreciate your support on this.

Further information in your planning and discussion:

As our customer is boat builder, they are more concern with operation and maintenance of these engines at the following stages of engine/genset installation:

- Commissioning
- Pre-Start
- Sea-trial
- E.g. the lever on the duplex filters, pre-start checking procedures
- Perhaps maintenance of smaller components if time permits

I think for more major maintenance procedures, we might not need to cover in too much depth.

Thank you and Yours Sincerely,
Johnathan

Subject: RE: Training for Strategic Marine - C32 and C4.4 (Target Q1 or Q2 2024)

Dear Giam Chong,
Thank you for the files.

So far, I already have everything that I need.
I hope you don't mind that in the future I might contact you again if I ever need additional information.

Best Regards,

Setyo Baskoro

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Pak Nanang & Pak Baskoro,

For Documents of C32 Propulsion Engines & C4.4 Gensets, please see:

- C32 & C4.4 Feature Consist.xls
- ZP201410.PDF
- J1Z10548.PDF (For Genset S/N: S1M10548)

For Photos, I am sending some photos that we have now when the engines/gensets were in our warehouse >> [C32 & C4.4 Photos.zip](#)

I will try to obtain some photos when Engine & Gensets are installed in vessel. If there is anything special I need to look out for, please let me know.

I am sorry, we do not have the drawing of the vessel, you may refer to this link:
<https://www.strategicmarine.com/vessel/stratcat-27-crew-transfer-vessel/>

For information of Fuel, it is marine diesel fuel, do you need more information?

Just to clarify, due to strictness of Safety Act & Regulation of shipyards and workplace in Singapore, we are unlikely able to conduct the training or practical session on a vessel set-up.

As explained in earlier email, we would need to arrange for the engine/genset to be available for practice in a workshop or warehouse environment.

- However, we can only power on the engine with battery connected.
- We will **not be able to run** the engine on fuel in the premises.

But please let us know your logistical requirements later and we will try to accommodate.

Aside to Pak [@Nanang Kurniawan](#),

Is there any possibility we can get a proposed week in Early April as an alternative date. We are meeting customer tomorrow and likely to discuss about training.

Thank you & Yours Sincerely,
Johnathan Giam

Thank you, Pak Nanang.

Pak Giam Chong,

While I'm also try to collect the necessary data about the engines, I would gladly accept about the general data for both the engines, like the drawing on the vessel, type of the fuel that used, type of the cooling system (keel cooling or heat exchanger), type of the oil pan (standard, deep, or shallow) and the capacity, etc.
The point is everything that could be used during the training.

Hi Pak Nanang,

Just to clarify, what are the documents that you need?

Understand your requirement for engines and gensets on vessel, will gather some photos. Anything specific that I should look out for? (e.g. pipe routing, etc etc)

We will try to check with customer again if early March 2024 is possible. **Do you have alternative week in early April 2024?** We can counter propose to customer if early March 2024 is not possible for customer.

Thank you,

Giam

Hi Giam Chong,
Would You inform Us documents of Engine C32 main and C4.4 Genset, the actual genset in vessel. Its better if You attach with some photos.

For this training We available in range 04 – 07 March 2024.

Duration 4 days

- C32 (2 days)
- C4.4 (2 days)

We will inform the quotation later.

Hi Pak Nanang,

Please see Serial number of engines:

- C32 Main Engines 1450BHP // ZP201410
- C4.4 Main Genset 86ekW // S1M10548

We can arrange for the engine/genset to be available for practice. However, we can only power on the engine with battery connected.

We will **not be able to run** the engine in the premises.

Please advise if:

1. Possible for the proposed training dates to be **on the last week of March 2024 (between 25 – 29 March 2024)**.
2. Updates on the training quotation

Thank you,
Giam

Some people who received this message don't often get email from giamchong@tussspl.com. [Learn why this is important](#)

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Pak Nanang,

Good day to you,

I like to get updates on 3 issues:

1. Any updates on this *"I still coordination internally if this training can be compact into 3 days with requirement still have basic training of E.T. Tool for the customer and it is possible to have practical session or not."*

Just to refresh the requirements communicated in previous email:

Reviewing both course syllabus, the standard course duration is about 4.5 days (C32 – 2 days + C4.4 – 2.5 days).

Would it be possible to:

Shorten the training duration to 3 days

Include some basic training of E.T. Tool for the customer

2. After discussing with our customer, we like to propose the training dates to be **on the last week of March 2024 (between 25 – 29 March 2024)**, please advise if these dates are available on your training schedule.
3. Like to check in to see if you have any updates for the quotation. (Since the email correspondence from last year, we actually only have the training rates based on 2022.)

To move things forward with our discussion with customers, we like to have confirmation that:

- Last week of March 2024 is available for your course instructors to conduct the training.
- Your finalisation and confirmation of the total course duration based on the training requirements

Looking forward to your comments and confirmation.

Thank you & Yours Sincerely,
Giam

Subject: Training for Strategic Marine - C32 and C4.4 (Target Q1 or Q2 2024)

Good Afternoon Pak Nanang,

One of our customers, Strategic Marine, is looking to have training for their engineers and technicians on the operation and troubleshooting of C32 Engines and C4.4 Gensets.

Specific Products

C32 1450HP Marine Engines

C4.4 86ekW Marine Gensets

We had this discussion last year with the syllabus sent to us (as attached) and would like to move forward with this training to be held in Singapore:

- Location: Singapore
- Date: Q1 or Q2 2024
- Duration: 2-3 days
- Attendance: Approx. 10-15 participants

We would need trainers from Trakindo training center to come down to Singapore & conduct the training.

As for training venue, we can arrange for engines to be available at venue if your trainers like to have some practical sessions.

However, the limitation is we will not be able to start & run the engine on premises. We can still connect up the batteries to power up the ECU for E.T. training.

Reviewing both course syllabus, the standard course duration about 4.5 days (C32 – 2 days + C4.4 – 2.5 days). Would it be possible to:

- Shorten the training duration to 3 days
- Include some basic training of E.T. Tool for the customer

Please let us know your thoughts on:

- Shortening of Course Syllabus
- Availability of Trakindo trainers in Q1-Q2 2024; and how many trainers will be required to conduct this training

Thank you & Yours Sincerely,
Johnathan Giam
